

\*\*\*\*NOTE TO THE MARKERS\*\*\*\*

The machination was made on [machination.io](https://machination.io) and I could only add a link to it on a pdf in this repository.

Additionally, The machination simulation is manual. This means when you want to run it you will have to select the weapons that each player will shoot, and select which player will be shot. Also, the spend money feature for a health pack for the players must also be selected manually.
